Did you know?

Common household leaks can add hundreds of extra gallons of water every day, stressing your septic system.

Don't Strain Your Drain!

Overloading your septic system with water is a leading cause of failure.

Save water and support your septic system's health. For the long-term care of your system, have your septic tank inspected and pumped out by a licensed septic tank contractor as needed (on average every three to five years).

Know your part, be SepticSmart!
